"James Carlton Has NO Competition. You MUST Share In The Wealth!"

While James Carlton's Shared CASH does not currently have any competition, James Carlton does challenge other companies and corporations to share their profits with customers. In recognizing the fact that upper management and CEO's are necessary in the running of businesses, Mr. Carlton thinks that the multi-million dollar salaries and staggering company profits are down-right greed based and sinful in light of the fact that the customer who spent money to make the high salaries and company profits possible.....goes lacking. It is further believed that if companies shared their profits with customers it would be the greatest economic stimulus ever seen. Customers, having more money to spend, would buy more products, invest more, stimulate the economy, and have a better lifestyle for themselves and their families. Companies would still make a profit and CEO's would still be paid. Sharing profits with every customer is a win-win situation for companies and customers alike. Let's control the Greed and narrow the gap between the haves and the have-nots.

Here's How It Works: You choose one of the product packages below and send us the amount listed for that package. Your order will be processed and you will be placed in a 4x3 FORCED SUPER-MATRIX to Share In Profits. We place 4 people under everyone that makes a purchase. When the 3rd Level below you is filled....It's your PAYDAY with Shared CASH!

Example: You make a purchase. 4 people get placed on your 1st Level. 16 people get placed on your 2nd Level. 64 people get placed on your 3rd Level. When your matrix is filled with 84 people making a like purchase after you it's your PAYDAY with Shared CASH!
